

Merichem Has Your Caustic Treating Problems Covered

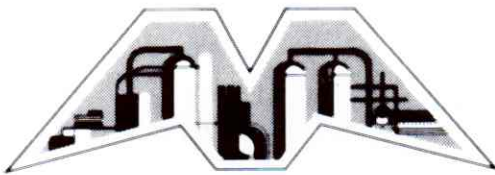

If your caustic treating system is causing incurable headaches, don't replace – RETROFIT.

Retrofitting is the fast, economical, reliable alternative to installing a new grassroots system. Installation can be complete in as little as four months, from initial concept to start-up.

Retrofitting existing equipment with FIBER-FILM™ Contactors saves you up to 80% of the capital costs involved in building a new grassroots unit. Best of all, Merichem's FIBER-FILM™ non-dispersive treating process increases system capacity by 50-300%.

Retrofitting by Merichem – The cure for your caustic treating headaches is right under our hat.
